

2010 CAMCORE ANNUAL MEETING, 30TH ANNIVERSARY

SÃO PAULO, BRAZIL

26 SEPTEMBER – 1 OCTOBER 2010

BRAZIL FACTS

Brazil (Portuguese: Brasil), officially the Federative Republic of Brazil (Portuguese: República Federativa do Brasil), is the largest country in South America and the only Portuguese-speaking country in the Americas. It is both the world's fifth largest country by geographical area and by population.

Bounded by the Atlantic Ocean on the east, Brazil has a coastline of over 7,491 kilometers (4,655 mi). It is bordered on the north by Venezuela, Guyana, Suriname and the French overseas department of French Guiana; on the northwest by Colombia; on the west by Bolivia and Peru; on the southwest by Argentina and Paraguay and on the south by Uruguay. Numerous archipelagos are part of the Brazilian territory, such as Fernando de Noronha, Rocas Atoll, Saint Peter and Paul Rocks, and Trindade and Martim Vaz.

Brazil was a colony of Portugal from the landing of Pedro Álvares Cabral in 1500 until its independence in 1822. Initially independent as the Brazilian Empire, the country has been a republic since 1889, although the bicameral legislature, now called Congress, dates back to 1824, when the first constitution was ratified. Its current Constitution defines Brazil as a Federal Republic. The Federation is formed by the union of the Federal District, the 26 States, and the 5,564 Municipalities.

Brazil is the world's eighth largest economy by nominal GDP and the ninth largest by purchasing power parity. Economic reforms have given the country new international recognition. Brazil is a founding member of the United Nations, the G20, Mercosul, and the Union of South American Nations, and is one of the BRIC Countries. Brazil is also home to a diversity of wildlife, natural environments, and extensive natural resources in a variety of protected habitats.

2010 CAMCORE ANNUAL MEETING, 30TH ANNIVERSARY

SÃO PAULO, BRAZIL

26 SEPTEMBER – 1 OCTOBER 2010

WEATHER

São Paulo has a monsoon-influenced humid subtropical climate. In summer, temperatures are between 17 C (63 F) and 28 C (82 F), and 32 C (90 F) on the hottest days. In winter, are between 11 C (52 F) and 23 C (73 F), and 6 C (43 F) on the coldest days. The average temperatures throughout the year are similar to those of Sydney and Los Angeles. The Tropic of Capricorn, at about 23°27' S, passes through north of São Paulo and roughly marks the boundary between the tropical and temperate areas of South America. Because of its elevation at 800 meters above sea level, São Paulo enjoys a distinctly temperate climate.

Rainfall is abundant, amounting to an annual average of 1,454 millimeters (57.2 in). It is especially common in the warmer month's average of 219 millimeters (8.6 in), and decrease in winter, average of 47 millimeters (1.9 in). Neither São Paulo nor the nearby coast has ever been hit by a tropical cyclone, and tornado activity is uncommon. During late winter, especially August, the city experiences the phenomenon known as “veranico” (little summer), which consists of a bout of unusually hot and dry weather, sometimes reaching temperatures well above 28 C (82 F). On the other hand, relatively cool days during summer are fairly common when persistent winds blow from the ocean. On such occasions daily high temperatures may not surpass 20 C (68 F), accompanied by lows often below 15 C (59 F).

ATTIRE

The Camcore Annual Meeting will be mostly informal with casual dress and field clothes, but sports coats and ties will be in order at the Dinner on Thursday. You may want a light jacket for evenings.
