

South Africa, officially the Republic of South Africa, is a country located at the southern tip of Africa. It is divided into nine provinces and has 2,798 kilometers (1,739 mi) of coastline. To the north lie the neighboring countries of Namibia, Botswana, and Zimbabwe; to the east are Mozambique and Swaziland; while Lesotho is an enclave surrounded by South African territory. South Africa is the 25th largest country in the world by area and the 24th most populous country with over 51 million people.

South Africa is a multi-ethnic society and has diverse cultures and languages. Eleven official languages are recognized in the constitution. Two of these languages are of European origin: English and Afrikaans, a language which originated mainly from Dutch that is spoken by the majority of white and Colored South Africans. Though English is commonly used in public and commercial life, it is only the fifth most-spoken home language. All ethnic and language groups have political representation in the country's constitutional democracy comprising a parliamentary republic; unlike most parliamentary republics, the positions of head of state and head of government are merged in a parliament-dependent President.

WEATHER

For the Annual Meeting and Field Trips in South Africa:

A subtropical location, moderated by ocean on three sides of the country and the altitude of the interior plateau, account for the warm temperate conditions so typical of South Africa – and so popular with its foreign visitors.

South Africa is famous for its sunshine. It's a relatively dry country, with an average annual rainfall of about 464mm (compared to a world average of about 860mm). While the Western Cape gets most of its rainfall in winter, the rest of the country is generally a summer-rainfall region.

At the same time, temperatures in South Africa tend to be lower than in other countries at similar latitudes, such as Australia, due mainly to greater elevation above sea level.

On the interior plateau the altitude – Johannesburg lies at 1 694 meters – keeps the average summer temperatures below 30°C. In winter, for the same reason, night-time temperatures can drop to freezing point, in some places lower.

South Africa's coastal regions are therefore warmest in winter. There is, however, a striking contrast between temperatures on the country's east and west coasts, due respectively to the warm Agulhas and cold Benguela Currents that sweep the coastlines.

Being in the southern hemisphere, our seasons stand in opposition to those of Europe and North America!

Summer

Over much of South Africa, summer (mid-October to mid-February) is characterized by hot, sunny weather – often with afternoon thunderstorms that clear quickly, leaving a warm, earthy, uniquely African smell in the air.

The Western Cape, with its Mediterranean climate, is the exception, getting its rain in winter.

ATTIRE

The Camcore Annual Meeting will be mostly informal with casual dress and field clothes, but smart casual attire will be in order at the Farewell Dinner on Friday. You may want a light jacket for evenings.

2013 CAMCORE ANNUAL MEETING
SOUTH AFRICA
15-19 OCTOBER – PRE-CONFERENCE TOUR
20-31 OCTOBER – ANNUAL MEETING

PRE-CONFERENCE TOUR ITINERARY

The pre-conference tour will be seeing the local nursery with *Pinus radiata* and *Pinus elliottii* seedlings. We will be visiting a number of Camcore Trails that include *Pinus tecunumanii* and *Pinus oocarpa* as well as older trails of *Pinus radiata* and *Pinus elliottii*. We will be seeing several Pine Hybrid Trails and probably visit one of the *Pinus radiata* seed orchards. It will be an interesting trip because the climate of the southern Cape is entirely different than the rest of South Africa.
